East German industry is planning to produce the Moskvitch automobile, which until now has been manufactured only in the USSR. The East German Moskovitch automobiles will be exported to Austria in the same manner as the "EMW" motorcycles which had been produced in East Germany. The Moskovitch is expected to sell in Austria for about 30,000 schillings.

25X1

Comment. Presumably the meaning of this is that the cars will be exported under the compensation agreement which governs Austro-East German trade.
